

Resolution # 13-1

WHEREAS, the Sangamon County Circuit Clerk is responsible for the record keeping of the proceedings of the Sangamon County Circuit Court, including new electronic filings; and,

WHEREAS, Supreme Court Order M. R. 18368 requires all courts to make their case documents and information available to the statewide remote access system known as re:SearchIL; and,

WHEREAS, the initial scope of re:SearchIL will limit case document access to judges and parties to a case; and,

WHEREAS, this order also allows an "integration" method to be used to accomplish this requirement by allowing re:SearchIL to retrieve the court's documents directly from the court's CMS permitting the clerks to manage confidential case information solely within their CMS and re:SearchIL will read those settings to prevent unauthorized access; and,

WHEREAS, JANO Technologies, Inc., the Circuit Clerk's CMS vendor has made available the software to allow this integration at a cost of \$52,900.00 on July 30, 2018; and,

NOW, THEREFORE, BE IT RESOLVED that the Sangamon County Board, in session this 14th day of August, 2018, hereby accepts the proposal from JANO Technologies, Inc. and authorizes the Circuit Clerk to contract for such software.

Sangamon County Circuit Clerk

re:SearchIL

Regarding: Re:SearchIL Integration with JANO CMS

Dear Paul:

Consistent with the Supreme Court of Illinois' May 30, 2017 Order, the Administrative Office of Illinois Courts, along with their partner Tyler Technologies, developed re:SearchIL to provide a single online portal for Illinois judges, parties to a case, and clerks to access filed documents. re:SearchIL is a secure web portal powered by the e-filing database and provides access to cases from across the Illinois Supreme Court, Appellate Courts, and Circuit Courts that e-file using a secure login.

In order to ensure interoperability with the local Sangamon County Circuit Clerk Case Management System (CLERICUS MAGNUS, developed by JANO) there are currently two methods to ensure case and document security on Re:SearchIL. 1) a manual "repository" model, that relies on duplicate and manual data entry and is prone to mistakes or 2) an "integrated" model that was developed by JANO to automatically synchronize the data and security between the local Sangamon County CMS and the statewide Re:SearchIL.

JANO's integrated model does three primary things:

- 1) Manages within CLERICUS MAGNUS CMS document security only for Re:SearchIL - so your local document security can be separate from your Re:searchIL security
- 2) Creates new triggers to alert RE:SearchIL to alert the statewide system of changes of case status and functions
- 3) Sends new webservices to share additional case information (and documents) to Re:SearchIL.

By purchasing this new software integration, you will ensure consistent interoperability between the JANO CMS and Re:SearchIL. We are proud to offer this new service to your court, and it is ready for use as of July 30, 2018
