

Resolution # M-1

WHEREAS, County policies and procedures require both the assigned oversight committee and the Finance Committee to approve all requests to apply for grants from Federal and State agencies, as well as grants from all other entities; and,

WHEREAS, County policies and procedures require that the acceptance of grants of \$30,000 or more must be approved by the full County Board;

WHEREAS, the Department of the Sheriff's Office wishes to apply for and accept an a grant from the Illinois Sheriffs' Association on behalf of the CDC and IDPH for the Detection & Mitigation of COVID-19 in Confinement Facilities program in the amount of approximately \$42,000 (Value Only); and

WHEREAS, this grant will allow the Sheriff's Office to provide COVID-19 tests to inmates and the sharing of health information (100% HIPAA compliant); and

WHEREAS, as documented by the approval of this resolution, the Jail Committee and the Finance Committee have approved the the Sheriff's Office Department's request to apply for the Detection and Mitigation of COVID-19 grant and the committees recommend that the County Board approve the acceptance of this grant, if awarded by the Illinois Sheriffs' Association on behalf of the CDC and IDPH.

NOW, THEREFORE, BE IT RESOLVED that the Sangamon County Board, in session this 14th day of February, 2023, approves the acceptance of the Detection and Mitigation of COVID-19 grant, which is detailed above, if the grant is awarded to the County by the Illinois Sheriffs' Association on behalf of the CDC and IDPH. The County Administrator is authorized to sign required grant documents to execute the agreement for this grant.

# SANGAMON COUNTY - GRANT APPROVAL FORM

Requesting Department: Sheriff's Office

Grant Program Title: Detection & Mitigation of COVID-19 in Confinement Facilities

This request is for:  a new grant  renewal or extension of an existing grant

Grantor: Illinois Sheriffs' Association via Center for Disease Control and Illinois Department of Public Health

Brief description of the grant program and its benefits to Sangamon County:

Sheriff's Office will be provided with a technology solution to effectively and efficiently detect and mitigate COVID-19 and its variants in the Jail. The Jail will receive an I.R.I.S biometric identification system. The system will provide limited and select data (100% HIPAA compliant information) from the individual's medical/healthcare record. Allows the sharing of information between the Sheriff's Office, IDPH, and local public health officials. The ISA will additionally provide COVID-19 testing equipment to the Jail.

Anticipated Grant Revenue Amount: Min. of \$42,000 (Value Only)

Are matching funds required?  Yes  No

If yes, please state the amount and the source of matching funds:

If this grant is approved, will any new personnel be hired:  Yes  No

If Yes, please indicate the number and cost of personnel:

Are there any **indirect** costs or **legal** requirements associated with this grant (i.e., increased workload on existing staff, requirements to continue specific programs after grant periods, etc.):  Yes  No

If Yes, please provide details. Include attachment if needed:

(Department Head Signature)

Date: 1/6/23

Andy Goleman  
SANGAMON COUNTY AUDITOR

**AGREEMENT**

This Agreement, made this \_\_\_\_\_ day of \_\_\_\_\_, 2022 by and between the Illinois Sheriffs' Association, with offices located at, 401 E Washington, Springfield, IL 62701 hereinafter referred to as ISA, and the **County Sheriff's Office**

**WHEREAS**, ISA has been awarded a grant/contract from the Center Disease Control Prevention and the Illinois Department of Public Health, hereinafter referred to as the "Project Sponsor", hereinafter referred to as "Sponsor Reference"; and,

**WHEREAS**, part of the overall project involves the following:

Detection & Mitigation of COVID-19 in Confinement Facilities

**WHEREAS**, the **County Sheriff's Office** has represented to ISA that it will actively participate and implement the purchased qualified and approved materials and or services for the Detection and Mitigation of COVID-19 in their jail.

**Contract Start Date:** **Contract End Date: (4 years after initiation)**

**ISA Program Contacts: Joyce Klein, Teri Schroeder and Jim Kaitschuk**

Now therefore, in consideration of the promises and mutual covenants herein, the parties hereto agree as follows:

**Program Requirements/Parameters**

a) The ISA will coordinate and manage the acquisition, implementation, and operation of an integrated, comprehensive program with the **County Sheriff's Office** a technology solution which will help Sheriffs effectively and efficiently detect and mitigate COVID-19 and its variants (and other communicable diseases now and in the future), in their jail. This system will improve the safety and health of staff, individuals in custody, visitors, and the public.

b) The **County Sheriff's Office** agrees that the system will be integrated with the jail's existing Jail Management System (JMS) and medical/healthcare system (electronic or paper-based) to virtually eliminate duplicate data entry and introduction of errors. The **Sheriffs' Office** will use the national, real-time I.R.I.S.™ biometric identification system at Intake/Booking to quickly capture a digital photograph of the unique features in the individual's irises. This biometric data is used to search and determine the identity and prior criminal activity of the individual in custody by comparing it, in seconds, to the Sheriffs' national I.R.I.S.™ database securely maintained at Nlets. If no match is found, a new record is created, and the individual is enrolled in the Sheriffs' I.R.I.S.™ system.

The individual's I.R.I.S.™ record is then integrated with limited and select data (100% HIPAA compliant) from the individual's medical/healthcare record. Data from the jail's JMS and medical/healthcare systems is combined with the iris biometric identification information to create the IRIS Med-Verify Plus™ record.

The encrypted data in the IRIS Med-Verify Plus™ record is used to efficiently capture, store, track, monitor, manage, and securely share critically needed healthcare and criminal justice information about an individual while in custody, when moved to another facility, or when released back into the community.

Unique and powerful alerts, and geo-based mapping technologies, are integrated with IRIS Med-Verify Plus™ which automatically and securely inform and provide real-time updates to the Sheriff's Office, state (IDPH) and local public health officials.

1-The biometric camera and the mount will be located within 25' (feet) from the "Intake" station computer and the "Release" stations computer.

- a. That is the maximum length of the cable that runs from the camera and the computer
- b. The mount needs to be installed (with 4 screws) on a countertop within that 10' from that computer.
- c. The computer shall have a "USB" port open to plug in the camera.

2-The County Sheriff's Office shall covid test new arrestees OR arrestees who remain in custody after first court appearance by a) a contracted vendor provided through the ISA to perform and process test, b) their own staff who will be supplied tests from ISA and have those test processed through ISA contracted vendor, or c) their own staff with use of an ISA supplied testing equipment and supplies. Rapid tests administered by jail staff are accepted.

3-The County Sheriff's Office shall report to IDPH, county and each individual their covid test results.

4-Provide monthly reports to ISA and additional as requested on testing and status of IRIS program. Reports will include but may not be limited to: total bookings, total inmates entered into IRIS and total inmates covid tested.
