RECOMMENDED - FINDINGS OF FACT**

Case #: **2008-06**

Address: **781 Gabriel Road**

- (i) Existing uses of property within the general area of the property in question.

There is a single family residence, cropland and timber to the north. There are single family residences to the east and south. There is cropland to the west.

- (ii) The zoning classification of property within the general area of the property in question.

There is agricultural zoning to the north, east, and west. To the south is R-1 zoning.

- (iii) The suitability of the property in question to the uses permitted under the existing zoning classification.

The Land Evaluation and Site Assessment score of 145 indicates the property is deemed acceptable for non-agricultural development.

- (iv) The trend of development, within the vicinity since the property was originally classified.

Property directly south was re-zoned to R-1 in 1987. The subject property was divided off from an existing single family residence in 2007.

(1-1)

**SANGAMON COUNTY
RECOMMENDED - STANDARDS FOR VARIATIONS**

Case #: **2008-06**

Address: **781 Gabriel Road**

The Zoning Board of Appeals shall not recommend to the Sangamon County Board that the regulations of this ordinance be varied as authorized in F. (1) hereof, unless it shall make findings of fact based upon the evidence presented to it in each specified case:

- (i) that the property in question cannot be economically used or yield a reasonable return, if permitted to be used only for the conditions allowed by the regulations.

The request is made to facilitate the development of a subdivision on the property including a cul-de-sac.

- (ii) that the plight of the owner is due to circumstances unique to the property and not generally applicable to other property in the area.

The petitioner has proposed creating a subdivision with only 15 lots on 30 of the 51 acres with the remainder left in open space. The plan includes a cul-de-sac resulting in several of the lots not meeting the lot width/depth ratio.

- (iii) that the variation, if granted, will not alter the essential character of the locality, impair an adequate supply of light and air to adjacent property, increase the congestion of traffic, or diminish or impair property values in the locality.

No negative impact is anticipated.
